---

Featuring songs from the actual movie!

Today's track is "**Prince Ali**" from **Aladdin** {audio}[http://www.angry-gamers.com/music/prince\\_ali.mp3{/audio}](http://www.angry-gamers.com/music/prince_ali.mp3{/audio}) Please note due to copyright issues I can not make this song available for you to download directly.

Now I'm sure all the SNES fans will disagree but the Mega Drive (Genesis) Aladdin had the superior sound track. The music done by one of my favorite game composers Tommy Tallarico managed to capture the feeling and fun of the movie and even though they are remakes of already liscenced songs I think they hold up on there own. The whole thing is capped off by the SNES version not even having my favorite Aladdin song in it. You guessed it; Prince Ali!
