The rumors are true! Orange Lounge Revolution 2nd MIX officially has a playable demo now! 16 of both your old favorite 1st mix revivals, and some brand new songs are available in this demo. Check out the official thread HERE for the download link!
The full version of the game is still TBA, so stay tuned to the site and the forums for new developments!
None of this would've been possible without tweak's stellar-looking orange theme though, so be sure and send him your thanks!!
