Over the past week we've explored Ninjas, espionage, horror stories and vampires, but finally we present OLR's number 1 Konami game series - Beatmania!

Released in 1997 for the arcades in Japan, Beatmania is a music game where you play as a DJ mixing tracks and tapping the keyboard. There are five keys and a turntable to control with, and you have to hit (or scratch) the notes as the fall down the screen. As you tap it adds beats to the song, and playing extra notes serves no penatly, but allows the player to add their own twist on things.
