I've decided to try out a new feature here on OLR since we all love video game music I wanted to do a track of the week.

With this I'll pick a piece of video game or game related music and put it up for you guys to listen to and get nostalgic about.

Since Street Fighter 4 is all the rage right now I thought I'd take a step back and play my favorite track from my favorite Street Fighter game.

This weeks track is "Let's Get It On" from " [Street Fighter III 3rd Strike](#) "

{audio}http://angry-gamers.com/music/202_let's_get_it_on.mp3{/audio}

Please note due to copyright issues I can not make this song available for you to download directly.

Composed by Hideki Okugawa (岡川英樹). [INFINITE](#) was the one who rapped the lyrics. Hideki is mostly known for his work in the Street Fighter 3 series (1997-1999).

This is one of my favorite pieces of music from modern video games. It's catchy and all around awesome. When you would get taken to the character select screen in Street Fighter 3 you were damn happy to be there just because of this song.

If you've got a song you would like to see featured or just remember something cool from some game let me know in the comments and I'll see what I can do about featuring it in an up coming article!
