Sorry all for the late update but my darling wife had her birthday yesterday so I'm running a little behind!

For me Landstalker, created by Climax, is one of the greatest action RPGs of all time! If you grew up with the Mega Drive (Genesis) like I did this was your Legend of Zelda. Awesome storyline, great music, memorable characters and inventive puzzles make this game is gem. Landstalker had a remake announced for the PSP a while ago but production seems to have ceased. On the up side however you can grab the complete Genesis game from the Virtual Console on the Wii! I **HIGHLY** recomend giving it a try.
