

Could a game we have previewed before be in a bit of legal trouble? That is what appears to be happening to Scratch: The Ultimate DJ. We talk about the lawsuit and our opinions on how it will all turn out. Also, part A has lots of World of Warcraft news tonight with the announcement of a total crack add-on for the game, as if it wasn't bad enough already! Also, is it truly possible that WoW might make its way to the iPhone? Or is this just an experiment that has gone one step too far? In Part B tonight, we confirm the existence of Lego: Rock Band edition. Is this a good thing for the franchise, or has the shark already been jumped? Also, one of the oddest fighting game / shoot-em up combinations we have ever heard of. All this and more including your chatroom comments, e-mails, telephone calls and so much more on the show where every gamer has a voice: Orange Lounge Radio.
