Tonight in headlines, Datel sues Microsoft over the memory card lockout. Capcom plans to release an interesting pair of games together, and plans some awesome crossover into Super Street Fighter IV. Could you soon see emergency alerts on Xbox Live? And what does Valve have to say about the Steamworks boycotts? Our live chatters and tweeters have plenty to say about this weeks news. Also, we are joined by Brian Moreno who gained notoriety this week by creating a Littlebigplanet version of Lady Gagas Bad Romance video. It is pretty great machima, and might even convert some gamers into saying "Rah Rah Ooo Lah La!" The fun does not end as we continue into Part B, with information on the next Tron game, as well as a proper sequel to Puzzle Quest. Also... could a recent After Burner arcade release be coming to PSN? Sounds cool, but would be much cooler with a rotating chair. All this and more including your chatroom antics, phone calls, live tweets and MUCH more on the show where EVERY gamer has a voice-- Orange Lounge Radio!
