We are back after an unexpected hiatus, but we have some upgrades in studio! After playing catch up, we get into the weeks news including a barrage of big Nintendo titles expected in 2010... could Nintendo be prepping for a fan service E3? And what is this about an OLR favorite classic PC Engine game looking at a pending virtual console release? We are excited... but someone who is not excited is Iwata, when it comes to the iPad. How does the community feel about this and other topics including an Ultima revival, new Pokemon and Borderlands DLC? Tune in to find out! In part B, we tackle a development on Microsofts game room that really does not surprise us at all. Also, what is the Microsoft and Capcom project and most importantly, how much will you pay for it? Doctor Who, Zombies, Lawsuits... it is all here too! All this and MORE including your chatroom antics, live phone calls, twitter topics and much more on the show where EVERY gamer has a voice - Orange Lounge Radio!
