

OH MY GOD GTA4 HAS NUDITY! ... and other mass hysteria hits the gaming circuit this week, but do we at Orange Lounge Radio really care? What about the live chatters?

There is lots going on in the world of movies made out of games and vice versa. A new Alice game is set to come out for the PC. Also, is it really possible they once wanted to make a movie out of Mega Man, or did someone make that up?

In Part B tonight, we talk about the confirmed release date for the DSi and Rhythm Heaven: April 5th. Our fair state of residence has had another setback in a controversial video game law. Also, news on how you can fjord the river on your iPhone!

All this and more including the Classic Game of the week, How was your gaming week, FUs of the week, release dates, the mailbag, and YOU THE GAMER via our chatroom, phone lines and any way we can get you on the air! It is all on the show where every gamer has a voice: Orange Lounge Radio!
