

We might not have planned our own April Fools joke for this year, but we talk about some of the hit and misses of April Fools around the industry. One announcement that wasn't a joke though was the long rumored Amazon "console", the Amazon Fire which yes-- can play Minecraft. Our hosts react to the news, and then when we get to our Foogle Question of the week we see just how many listeners actually plan on buying one.

Also in the news:

- * Mario Kart 8 Information

- * Gamespy going offline

- * Elder Scrolls Online launches

- * Gaist Crusher Sequel
