

What a busy week in gaming news? Who could have possibly predicted that Unity would indeed unify the whole industry against them by making a switcheroo change to their pricing. With some oddly timed sales of stock, could this go so far as to land a major CEO in hot water legally? Well if there's any justice in this world there might be... is what one host of Orange Lounge Radio says multiple times! All this AND two big "direct" presentations from Nintendo and Sony in the same day. Phew, what a week! Tune in to hear the wrapups on all this and much more on another week of a podcast that's been running so long it's older than Steam, Orange Lounge Radio!

Also in the News:

- * Square Enix Investor Reception
- * Digital Eclipse Taking on Wizardry
- * Nexus Mods bans a Starfield Mod (with good reason)
- * Is Gearbox Being Primed for Sale?

All this and more on the show where EVERY gamer has a voice-- Orange Lounge Radio!
