PODCAST FEED EXCLUSIVE - On this show that was not taped live due to an unexpected emergency on Sunday, we take a very unscripted approach to our usual topics such as our gaming weeks, the mailbag, twitter topics, classic game of the week and more. Lots of news is touched on including Project Natal rumors, further developments on expansions of the "ten dollar" online codes, Warcraft Armory on the iPhone, Zynga vs. Facebook and SO much more. Even when we are not live, we are still the show where EVERY game has a voice (even when taped), Orange Lounge Radio.
