We are joined in studio by one of our favorite indie gamemakers, YYR! YYR talks to us about his game Multitasking, recently approved on Steam Greenlight for release, as well as what the future might hold for those that were creating games for Xbox Live Indie Games. We also get into the news of the week, which includes a very explicit (oops :X) discussion on characters in Overwatch in very compromising situations on the internet which Blizzard is seemingly trying to shut down.

Also in the news:

* No Man's Sky delayed again

* New E3 public event next to main event

* New Megaman series details

* Playstation 4 sales milestone

All this and more on the show where EVERY gamer has a voice-- Orange Lounge Radio!
